

Eastdil Secured is a real estate investment banking firm that provides its clients with transactional services focusing on the recapitalization of their real estate assets. The Company specializes in high profile investment property sales, debt placement, sale of existing mortgages, corporate finance and capital raising for real estate companies. Eastdil Secured's investment sales and financings include some of the most highly regarded properties of their respective types, including Class "A" office buildings, premier retail centers, distinguished resort properties, luxury apartment communities, and state-of-the-art R&D buildings and industrial parks. Eastdil Secured is a wholly-owned subsidiary of Wells Fargo & Company.

Eastdil Secured seeks to fill an Analyst level position in its Boston, MA. office. The position requires an understanding of commercial real estate, debt and equity structures, and cash flow projections.

Responsibilities include: creating pro forma financial models for the financial analysis (including discounted cash flow analyses and IRR projections), of investment properties debt transactions and other structured finance transactions; assisting in preparation of offering memorandum packages and new business presentations; gathering and evaluating real estate market data; due diligence collection and review; providing general analytical support to the deal team.

Background Required:

All candidates must have a B.A. or B.S. degree, preferably in Finance, Business, or related area, with strong academic credentials. Ideal candidate will have 1-2 years of Commercial Real Estate analytical work experience or relevant internship experience. Proficiency in Microsoft Excel and basic knowledge of Argus is required. Excellent organizational, analytical, written and verbal communication skills, ability to establish and execute project timelines, ability to work as part of a team, and execute sound reasoning and judgment are required. Must be detail-oriented, a self-starter, accustomed to fast-paced work environment, and skilled at initiation and follow-up. Excellent computer, analytical, and communication skills are essential.
